

PROFESSIONAL SUMMARY

Full-Stack Developer & DevOps Engineer with proven experience building and deploying production-grade applications. Skilled in MERN stack, microservices, Docker, Kubernetes, and AWS. Hands-on with container orchestration, HPA auto-scaling, CI/CD pipelines, and async job queues (BullMQ/Redis). Passionate about building scalable systems and solving complex technical challenges through innovative solutions.

SKILLS SUMMARY

Languages: JavaScript, TypeScript, Python, C, C++
Frameworks & Tools: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Zustand, Framer Motion, Vite, JWT, bcrypt
Databases: MongoDB, MySQL, Redis, Prisma, Mongoose
DevOps & Cloud: Docker, Kubernetes (K8s), HPA, Jenkins, Terraform, Ansible, CI/CD, AWS, Oracle Cloud, Linux
Infrastructure: MinIO (S3), BullMQ, Nginx, cPanel
Soft Skills: Leadership, Problem-Solving, Team Collaboration, Communication, Project Management, Adaptability

EDUCATION

Amity University <i>Bachelor of Technology (B.Tech) — Computer Science and Engineering, CGPA: 7.22</i> 2022 – 2026	Madhya Pradesh, India
Ebenezer Hr. Sec. School <i>Higher Secondary (XII), Computer Science — MP Board, 74%</i> 2022	Banmore, MP
Ebenezer Hr. Sec. School <i>High School (X) — MP Board, 78%</i> 2020	Banmore, MP

EXPERIENCE

Web Development Intern — Saanvi Innovative Solutions Gwalior, Madhya Pradesh Stipend: ₹10,000/month	Apr 2026 – Present
- Project Overview: Working on full-stack web development projects using the MERN stack with scalability for web platforms. - Responsibilities: Handling deployment and management of multiple client websites on cPanel hosting; implementing responsive UI/UX designs; contributing to code reviews, debugging production issues, and optimizing performance. - Tech stacks: Node.js, Express.js, React.js, MongoDB, Docker, cPanel	
Front-End Development Intern — DevSkillHub (AICTE Certified) Virtual Internship	Completed
Completed AICTE-certified virtual internship focused on front-end development concepts, modern JavaScript frameworks, and industry best practices.	

PROJECTS

- PDFKit – Microservices PDF Utility Platform**
Problem: Users needed a no-signup PDF toolset; existing tools required accounts and didn't scale under load.
Solution: Built a guest-first platform with 9 microservices on Kubernetes with HPA auto-scaling. Delivered 39 backend APIs, 20 frontend tools, 342 tests.
Tech: Node.js, TypeScript, Express.js, Next.js 15, Docker, Kubernetes, MySQL, Redis, MinIO, BullMQ, Nginx
- NexusOne – Multi-Model AI Workspace**
Problem: AI users had to switch tabs to compare responses from different models with no unified workspace.
Solution: Built a SaaS platform where one prompt routes to multiple AI personalities in parallel via SmartMix engine. Enforced 4-tier subscription system with server-side guards, JWT + OAuth auth, encrypted API key management, and Admin Console.
Tech: Node.js, Express 5, MongoDB, React 19, Vite, Zustand, Tailwind CSS, Groq API, JWT, Passport.js
- Learnify – AI-Powered Learning Platform**
Problem: Students lacked a single platform for structured learning with instant doubt resolution and progress tracking.
Solution: Developed a full-stack e-learning platform with AI-driven doubt-solving, gamified learning modules, and personalized progress dashboards. Implemented secure JWT + bcrypt auth, deployed via Vercel and MongoDB Atlas.
Tech: Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, bcrypt, Vercel
